**[1] DownTown jacket**

Just as sun follows rain, business meetings eventually give way to getting out on your bike. And this half-length, two-in-one parka-style jacket will help you make the perfect getaway. Thanks to the removable thermo jacket, you can wear it comfortably over a jacket or suit, providing a high level of protection if you commute to work on your bike.

**[2] Summer trousers**

When temperatures are high, these summer trousers come into their own by keeping you luxuriously cool. But they're not just lightweight, good-looking and protective: it takes a moment to unzip the legs and turn them into shorts, removing the knee protectors in the process.

**[3] Urban boot**

Everything a maxi-scooter rider needs in a short-shaft boot. A special hydrophobic treatment ensures the cowhide leather is both water-repellent and breathable. The boot is reinforced at the heels and toes, and features elastic material around the ankle for added comfort.

BMW Motorrad has joined forces with Datatag, the country's leading provider of security marking solutions, to give BMW motorcycle owners an additional level of theft protection and peace of mind.

All BMW Motorcycles will be fitted with the Datatag's industry-leading system to deter theft, free of charge. Datatag's advanced system enables the identification of stolen motorcycles and parts, thereby assisting the police in prosecuting motorcycle thieves and making BMW motorcycles less attractive to criminals.
